

CAPABILITY STATEMENT

GOVERNMENT & PRIME CONTRACTOR DELIVERY

CORE COMPETENCIES

LeCrown Development designs and delivers governed enterprise technology that moves complex initiatives from strategy to secure, measurable operation. Founder-led execution combines architecture, engineering and delivery leadership in one accountable team.

- Enterprise data and AI platform architecture, governance, MLOps and knowledge systems
- Cloud modernization, platform engineering, DevSecOps, infrastructure as code and FinOps
- Custom software, portals, APIs, workflow automation, systems integration and decision support
- Technology strategy, solution architecture, program delivery and operating-model design

COMPANY DATA

NAICS 541512 (Primary) | 541511 | 541519 | 541611

PSC DA01 | DD01

NIGP 918-71 | 920-40 | 920-45 | 920-37

Service Area Nationwide delivery | Houston-based

Delivery Remote, hybrid and on-site | Prime or subcontractor

Credentials

Azure Data Fundamentals • Azure Databricks Platform Architect • Scrum Master Certified • B.S., University of Houston

COMPANY EXPERIENCE

Sysco | Enterprise Data & AI Platform Architecture (Key Personnel, 2024-present)

Designed governed cloud-platform patterns, self-service provisioning, identity and policy controls, reusable delivery capabilities and operating-model guidance for enterprise data and AI teams.

LeCrown Development | Secure Digital Portals & Automation (2025-present)

Architected and delivered client portals, authenticated document workflows, intake automation, service integrations and containerized cloud deployments from discovery through production.

Energy & Industrial Enterprises | Cloud, Data & Application Delivery (Key Personnel)

Led solution architecture, software delivery, integration and modernization initiatives in asset-intensive, regulated operating environments with globally distributed stakeholders.

DIFFERENTIATORS — DOCUMENTED DELIVERY OUTCOMES

50%

cycle and cost reduction achieved through automated data-pipeline delivery.

\$20M+

in program value protected through architecture and quality governance.

30%

delivery improvement achieved through Agile and DevOps transformation.

75%

cost savings achieved through targeted business-process automation.

TECHNOLOGY ENVIRONMENT

GCP • Azure • AWS • Databricks • Snowflake • Kubernetes • Terraform • ServiceNow • Kafka • Python • FastAPI • React

DELIVERY READINESS

Discovery • Architecture • MVP/Pilot • Modernization • Integration • Documentation • Production deployment • Knowledge transfer

Selected outcomes reflect documented key-personnel engagements. References and supporting detail are available for qualified opportunities. LeCrown Development is available for prime, subcontract and teaming engagements.
